Profile

I am a Staff Software Engineer specializing in Frontend Engineering for 20+ years. I have experience with HTML, CSS, Javascript frameworks including React, StencilJS, Ember, Angular, and Node.JS.

Experience

Staff Software Engineer, Ad Hoc LLC; Remote — 2018-Present

- Helped relaunch Medicare's Plan Finder tool
- Added end-to-end testing to Medicare's QPP platform
- Led creation and adoption of Web Components for the VA Design System
- Tech Lead for two different Front End teams
- Used Web Components, React, JavaScript, CSS/SASS, HTML/JSX

Front End Architect, InfoArmor; Remote — 2017-2018

- Led a team of five in a complete remake of InfoArmor's Identity Theft Prevention client portal (PHP Smarty Templates into React)
- Created a new login and authentication system
- Used React, MobX, JavaScript, CSS/SASS, and HTML/JSX

Front End Developer, Freelance — 2015-2017

- ADP - Sr. React Consultant. Architected a drag-and-drop, WYSIWYG desktop application for creating page layouts which compiled into a JSON specification. Used React, JavaScript, Node.JS, and Electron.
- Remine - UI/UX Developer. Completed version 1.0 of their big-data real estate analytics application; also redid their website. Used JavaScript, CSS/SASS, Bootstrap.
- Rezli - Front End Developer. Responsible for the front end redesign and implementation of their social network for video gamers. Used React, JavaScript, Ember, Apex, Salesforce, CSS/SASS.
- CodeScience - UI Engineer. Developed single-page applications (SPAs) both on and off the Salesforce platform, including an Excel-like spreadsheet app and updates to Salesforce's blog platform. Used JavaScript, Ember, Apex, Salesforce, CSS/SASS.
- Highland Plaza Preschool - WordPress Developer. Designed and developed a refreshed website for this non-profit organization using WordPress, along with staff training so that they felt comfortable and confident in updating the website themselves. Used WordPress, PHP, JavaScript, CSS/SASS, Adobe Photoshop.

(Continued on next page)

Front End Developer, Orthobanc; Chattanooga, TN — 2015

- Created a database administration GUI for internal use
- Provided backend API creation support
- Used Ember, JavaScript, Bootstrap, CSS/SASS, Node.JS, Sails.JS

Sr. Technical Consultant, Firma8; Chattanooga, TN — 2009-2015

- Created an e-learning system, a live-streaming video platform, a translation plugin for Adobe InDesign, website and document translators, a translating chat system for call centers, and an online video/audio player built with HTML and JS (no backend)
- Produced product demo videos, screencasts, and manuals
- Used JavaScript, CSS/SASS, Ruby on Rails, PHP
